REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance:

Specification

The requirements for deposit ATCC accession No. BP-7790 have been met. Applicants' argument that the declaration indicates the chain of custody was maintained since the time of filing is persuasive. Applicants' arguments include a description of the breeding strategy used to make the SKG strain. While the specification does not clearly teach which breeding resulted in the SKG strain that was deposited as ATCC accession number BP-7790, one could obtain the SKG strain using deposit ATCC accession No. BP-7790.

Claim Rejections - 35 USC § 101

The rejection of claim 13 under 35 U.S.C. 101 as being directed to non-statutory subject matter has been withdrawn because the SKG strain was obtained by non-naturally occurring mating and backcrosses.

New Matter

The rejection of claim 13 under 35 U.S.C. 112, first paragraph, new matter, has been withdrawn because, while the specification did not adequately teach how to make the SKG strain deposited as ATCC accession No. BP-7790 (i.e. which embryos from the complex breeding strategy were deposited), one of skill could obtain the SKG strain from the depository.

Written description

The rejection of claim 13 under 35 U.S.C. 112, first paragraph, written description, has been withdrawn because, while the specification did not adequately teach how to make the SKG strain deposited as ATCC accession No. BP-7790 (i.e. which embryos from the complex breeding strategy were deposited), one of skill could obtain the SKG strain from the depository.

Indefiniteness

The rejection of claim 13 under 35 U.S.C. 112, second paragraph, as being indefinite has been withdrawn because, while the specification did not adequately teach how to make the SKG strain deposited as ATCC accession No. BP-7790 (i.e. which embryos from the complex breeding strategy were deposited), one of skill could obtain the SKG strain from the depository.

Claim Rejections - 35 USC § 102

The rejection of claim 13 under 35 U.S.C. 102(b) as being anticipated by Nordling of record (1992, Arthritis and Rheumatism, Vol. 35, pg 717-722) has been

Art Unit: 1632

withdrawn in view of applicants arguments. The mice of Nordling have a different manifestation of arthritis than those deposited as BP-7790 as claimed. Therefore, the mice of Nordling have a different structure than those deposited as BP-7790.

The rejection of claim 13 under 35 U.S.C. 102(e) as being anticipated by Yamanaka (US Patent 4,950,741) has been withdrawn. The mice of Yamanaka have antibody response against an arthritis-specific protein while the mice deposited as BP-7790 have symptoms of arthritis and an arthritis related gene. Therefore, the mice of Yamanaka have a different structure than those deposited as BP-7790.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Inquiry concerning this communication or earlier communications from the examiner should be directed to Michael C. Wilson who can normally be reached at the office on Monday, Tuesday, Thursday and Friday from 9:30 am to 6:00 pm at 571-272-0738.
